ENGINEERS' CHIEF GOES TO COLORADO

Returns to Field on Trip of Inspection Into Forests.

W. E. Herring, chief of the office of engineering, Forest Service, has returned to the field on a trip of inspection of the extensive improvement work now going on in the national forests. He goes first to Colorado and then will inspect the improvements in southern California, New Mexico, and Arizona. Last winter Congress appropriated \$500,000 for much needed improvements in the forests and Mr. Herring's office has been one of the busiest in the Forest Service this summer in pushing the work to insure the completion of the greater part before the coming of winter. NOTES OF LADY MACCABEES.

Announcement is made by the Ladies of the Maccabees of the World that they have adopted the table of rates recommended by the Fraternal Congress, which held its annual session in Buffalo last month.

The congress reaffirmed the proposition that no fraternal beneficiary society should undertake to furnish benefits except upon a table which will bring to the society adequate contributions for the benefits promised. It was also recommended that all such readjustment should be upon a table of rates not lower than the National Fraternal Congress table, and in no event lower than the experience of each society shows to be necessary.

The adoption of these recommendations now makes the Ladies of the Maccabees one of the largest fraternal beneficiary societies for women in the world.

EARTH AS FOOD.

In New Caledonia, New Guinea, and in the Malay archipelago the consumption of earth as food is comparatively common. In Java and Sumatra a certain kind of clay undergoes a preliminary preparation, being mixed with water, reduced to paste, and the sand and other hard substances removed.

The clay is then made into small tablets or cakes about as thick as a lead pencil and baked in an iron saucapant. When this process is over the cake of earth resembles a piece of dried pork. The Javanese eat small figures roughly modeled from clay, made to imitate animals, birds, or men.

ORIGIN OF THE "X" MARK.

It is well known that people who are unable to write usually use for their signatures the familiar form of X. Why this sign is used instead of any other is not generally known. In times long gone by the early Christians used to sign with the cross to distinguish them from the heathen. Kings and nobles, too, were wont to affix a cross to documents, whether they could write or not, as a symbol that they pledged themselves to the truth of the matter to which the cross was affixed.

The cost of building the walk in the new location will be between \$50,000 and \$60,000, but the city will not lose much in the end because the change in location will bring about \$600,000 worth of additional taxable property into the market.
